

SERVICE BOND, DISCONTINUE BOND, STATE QUOTA & STIPEND:-

Here's a detailed explanation of the service bond, discontinue bond, state quota, and stipend for AIIMS MBBS students:

1. Service Bond in AIIMS for MBBS

- AIIMS MBBS Students are not required to sign a service bond after completing the MBBS course.
- Students are free to pursue postgraduate studies or work in any healthcare setting without any mandatory service commitment.
- However, state-sponsored candidates (those receiving financial aid from the state) may have specific service bond requirements to serve in the respective state for a certain period, though this is generally not applicable to AIIMS as a central institution.

2. Discontinue Bond in AIIMS for MBBS

- If a student discontinues the MBBS course after admission, they may be required to pay a discontinue bond penalty.
- Penalty Amount: The bond amount varies by campus but typically ranges between ₹5-10 lakh. This fee compensates AIIMS for resources and opportunities utilized during the initial phase of education.
- The bond is applicable if a student leaves the course midway, either voluntarily or due to personal reasons.

3. State Quota for AIIMS MBBS

- AIIMS does not have a state quota for MBBS admissions.
- The MBBS seats at AIIMS are filled based on NEET-UG ranks, and all candidates compete in a single pool, regardless of their state of origin.
- However, 50% of the seats are reserved for AIIMS internal candidates (those who have completed their schooling from AIIMS).
- The remaining 50% of seats are open for candidates from other medical colleges across India, including state candidates, as per the NEET-UG rank.

4. Stipend for AIIMS MBBS Students

- Internship Stipend:
- AIIMS MBBS students are provided with a stipend during their 1-year internship after completing their final year.
- The stipend is approximately ₹23,000–₹28,000 per month, depending on the campus.
- This stipend is paid to support living expenses during the mandatory internship, where students gain hands-on clinical experience in hospitals.
- Other Benefits:
- Free hostel accommodation (for most campuses).
- Subsidized meals in the mess.
- Access to other student facilities like sports, library, etc.
